

IN THE SPECIFICATION

Please replace the paragraph beginning on page 7, line 18 of the specification with the following replacement paragraph:

According to the invention, the term “pyrrole monomer” is intended to mean a monomer of pyrrole or a polymerizable derivative [[or]] of pyrrole. The pyrrole monomers that can be used in the present invention are those that are known to those skilled in the art in methods for producing biochips. As a derivative of pyrrole, mention may be made, for example, of methyl pyrrole, or substituted or unsubstituted pyrrole dimers.
